Experience

2021 - 2023

Bpointer Technologies I Hinjewadi Phase II, Gera Imperium, 411057

Web Developer

At Bpointer Technologies, I honed my Backend development skills over 2.9 years, excelling in project development from scratch, Maintain existing projects

- Hands on Laravel, PHP, MySQL, HTML5, CSS3, Bootstrap, JavaScript, jQuery, Ajax
- Experience on Design & Development of websites using laravel
- Having great knowledge in project hosting on Cpanel, Hostinger Panel
- Used Yajra Datatable libraries in development
- Got experience with printmedia in one of the government projects
- Worked on Rest API's using JWT token
- Third Party API's like SocketLab for email templating and OTP base login, Whatsapp
- Used Barcode/QR code library for printing
- Payment Gateway integration like USAEPay and razorpay

Projects

2023

PanelGames - Admin Panel

<https://panelgames.in>

Integrated third party API for Whatsapp Integration. Technologies used MySQL and Laravel, Admin can create/manage/delete whatsapp groups from admin panel. Added Spatie permission library for authorizing admin and system users. Admin can manage multiple agents and their commission based on games they are playing.

2023

P3 Trading Consultancy - Admin Panel & API's

p3tradingconsultancy.com

Technologies used MySQL and Laravel, Added Spatie permission library for authorizing admin and sub-admin. Admin can manage multiple sub-admin as per authorization. Integrated JWT Token for Rest API's for cross-platform applications. Integrated firebase for notifications and live chat functionality.

2022

TheTechTrader

<https://thetechtrader.com/>

Maintainance projects developed using PHP and MySQL. Integrated third party API's like USAEPay Payment Gateway and email templating using SocketLab. Worked on Maintaining customer packages and their billing (recurring billing). Managing their packages like upgrading / downgrading as per customer selection and maintaining their credit card details in database. Using payment captured webhook updating customers recharge and packages for every month in database and panel.
